

Cash Stuffing Allocator Kit

Exact allocation math + printable labels + tracker sheets

Monthly income

\$500.17

Date prepared: August 16, 2026

How it works

1. Set your category weights — they must add up to exactly 100%.
2. The worksheet shows each envelope's exact dollar amount.
3. Cut the labels, tape them on envelopes, stuff the cash.
4. Track spending and savings on the tracker sheets.

Every envelope amount is rounded down to the cent. The 'Leftover / buffer' line keeps the total exactly equal to your income: \$500.13 in envelopes + \$0.04 leftover = \$500.17.
